 21 Nerys Hughes Versus The Time Tunnel
 Engineered by house engineer!

This is a compilation of live recordings of Cats Against The Bomb recorded over a 3 year period. It captures the very beginnings of the one-man noise machine, and charts the development of plutonium rock and roll.

Thanks to Doug, Allen for the "just show up" advice for Nottingham, Staff for too many things to mention, Richard for photography and Chris Secker for having a good hunch in soundcheck.
